

Chai Review Lister

Tanvi Singh

The Concept

- Creating a beverage review app
- Almost referencing the Yelp/ OpenTable/ Resy apps, but more minimalistic and navigable
- A data tracker to personally keep track of the variety tried and experiences correlated with each drink
- Adaptable daily journaling app

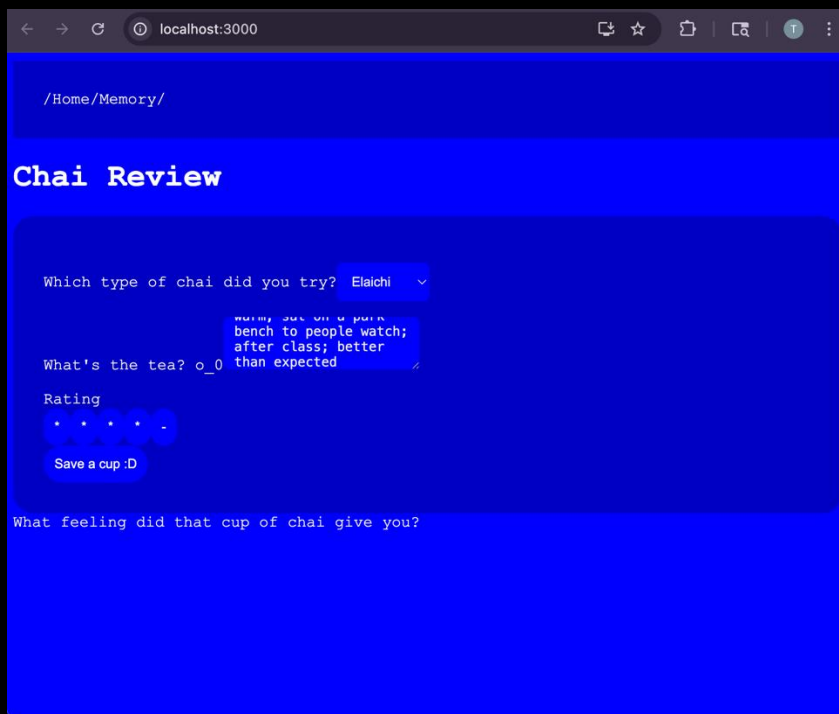

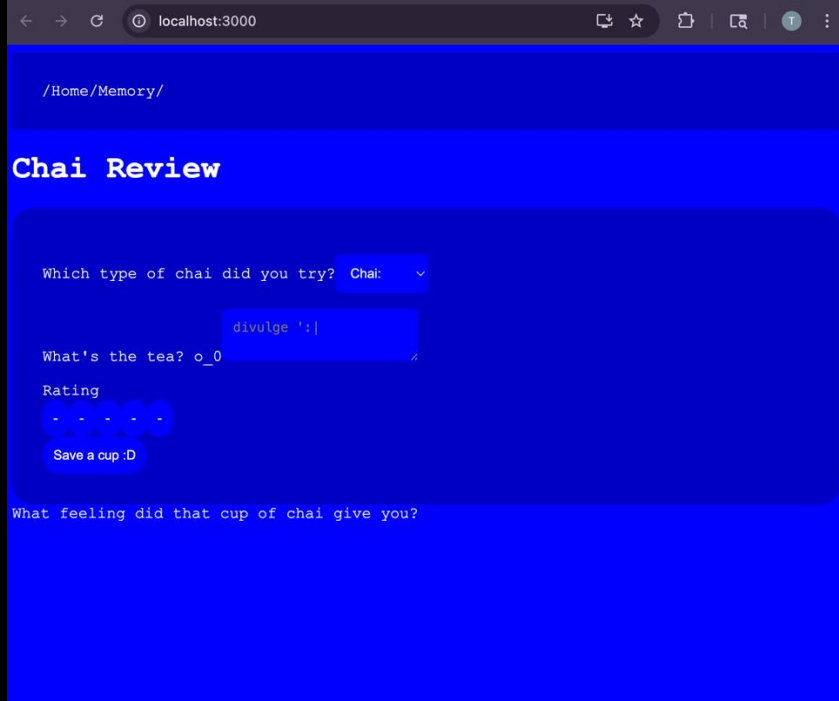

JS App.js	JS index.js	JS About.js	JS Home.js X	JS ChaiList.js	JS NavBar.js	JS R
-----------	-------------	-------------	--------------	----------------	--------------	------

```
src > pages > JS Home.js > Home > handleSubmit
1 // import React from "react";
2 import { useState } from "react";
3 import RatingStars from "../components/RatingStars";
4 import ChaiList from "../components/ChaiList";
5
6 function Home({
7   entries = [], onAdd, onDelete })
8 {
9
10  // drawing elements to be used and defining default settings
11  const [style, setStyle] = useState("");
12  const [rating, setRating] = useState(0);
13  const [notes, setNotes] = useState("");
14
15  function handleSubmit(e) {
16    // the event handling for the form submission: https://react.dev/learn/responding-to-events
17    e.preventDefault();
18
19    const entry = {
20      style,
21      rating,
22      notes: notes
23    };
24
25    // resetting the display after every submit handling
26    onAdd(entry);
27    setStyle("");
28    setRating(0);
29    setNotes("");
30  }
31
32  // formatting the home page
33  return (
34    <div className = "page">
35      <h1>
36        | Chai Review
37      </h1>
38
39      <form onSubmit = {handleSubmit} className = "card" >
40        <p>
41          Which type of chai did you try?
42          <select value = {style} onChange = {(e) => setStyle(e.target.value)}>
43            <option>Chai:</option>
44            <option>Masala</option>
45            <option>Adrak</option>
46            <option>Elaichi</option>
47            <option>Kashmiri</option>
48            <option>Cutting</option>
49            <option>Filter</option>
50            <option>Other(?)</option>
51          </select>
52        </p>
53    </div>
54  );
55 }
```

Layout + Code Snippet

- >src
 - >components
 - ChaiList.js
 - NavBar.js
 - RatingStars.js
 - >pages
 - About.js
 - Home.js
- App.js
- Index.js
- Style.css

Visual Goal
